Public Score	Private Score
0.81598	0.81690

The methods I used to pass the strong baselines include:

1. Use DaNN
2. Update lambda with iteration ($\lambda = \frac{2}{1+\exp(-10 \times epoch/1000)} - 1$)
3. Increasing epoch to 1000
4. Use VGG11 model to be feature extractor
5. Both of label predictor and domain classifier are combined with two linear layer with BatchNorm1d and ReLU
